

A new vibrator is a bit like a new partner...

... it's worth getting to know each other first.

First Things First

To turn it on, click on the button

Click again to navigate between the 4 speeds and 2 pulsation modes

To turn off, press and hold the button. To turn on/off the travel lock, press again for 4s

Light blinking = Low battery

Charging

Fully charged

Hot Spots

-
- Clitoral glans
- Visible part of the clitoris
 - Richly innervated
 - Highly sensitive
- Labia minora
- Contains erectile tissue
 - Many sensory receptors
- An anatomical diagram of the female genitalia (vulva) with labels for the clitoral glans and labia minora. The clitoral glans is shown as a small, pink, circular structure at the top, and the labia minora are shown as the inner folds of the vulva. The diagram is overlaid with a semi-transparent red shape that matches the vibrator's flame shape.

The flame shape of The Firefighter offers a broader touch that stimulates both the clitoris and labia; a popular way to build arousal and to climax.

DISCOVER YOURSELF

Remember that your vibrator is a device, but your body isn't! What brings pleasure varies between vulva owners, and from one day to the next. Keep on exploring yourself, be curious about your sensations and renew the experience every time. Just like you would for good partner sex!

Pleasure Tips

Apply the rounded nose on your clitoral glans and bring down the rest of the flame on the labia around.

Start with slow speeds first to tease yourself, then play with the vibration intensity to build up arousal.

Try edging by reducing pressure and speed when you feel you approach climax. This can lead to more intense orgasms!

Use The Firefighter during penetrative sex to add clitoral stimulation, which most vulva owners need to orgasm.

Vibrator Hygiene

Your Firefighter knows how to handle water. To keep it clean and happy, wash it with water and soap, then pat it dry. We recommend doing this before and after use.
