

A new vibrator is a bit like a new partner...

... it's worth getting to know each other first.

## First Things First

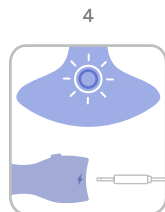

To turn it on, click on the button

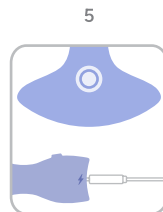

Click again to navigate between the 3 speeds and 2 pulsation modes

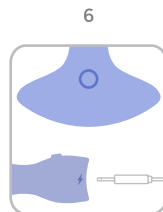

To turn off, press and hold the button. To turn on/off the travel lock, press again for 4s

Light blinking = Low battery

Charging

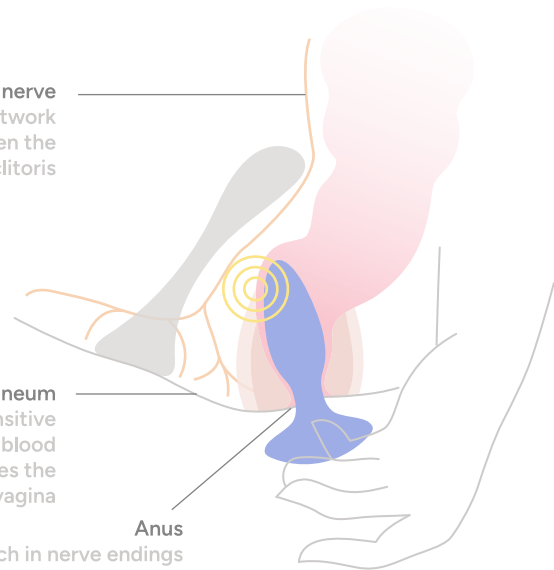

Fully charged

## Close Connections

**Pudendal nerve**  
• Nerve network shared between the anus and the clitoris

**Perineum**  
• Highly sensitive  
• Engorges with blood and compresses the vagina

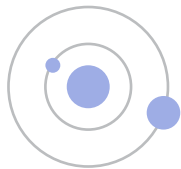

**Anus**  
• Rich in nerve endings  
• Anal canal close to the vagina

## DISCOVER YOURSELF

Remember that your vibrator is a device, but your body isn't! What brings pleasure varies between vulva owners, and from one day to the next. Keep on exploring yourself, be curious about your sensations and renew the experience every time. Just like you would for good partner sex!

## Pleasure Tips

Whether solo or partnered, take your time. Start by teasing the perineum and anus in circular motions with the tip.

The anus does not self-lubricate, so be sure to add generous amounts of water-based lube!

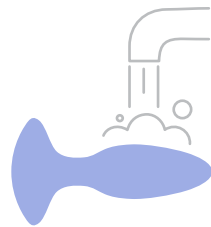

To insert The Neighbor, go slow and steady (try without vibration first). Get into positions that create space, like doggy style.

Once inserted, play with the modes. Leave The Neighbor in and stimulate other regions, like the clitoris or the vagina, for extra pleasure.

## Vibrator Hygiene

We all like a well-kept neighbor. Always clean the anal toy before and after internal use, including when you switch from anal use to vaginal use or between partners. Wash it with water and soap, then pat it dry.
