

A new vibrator is a bit like a new partner...

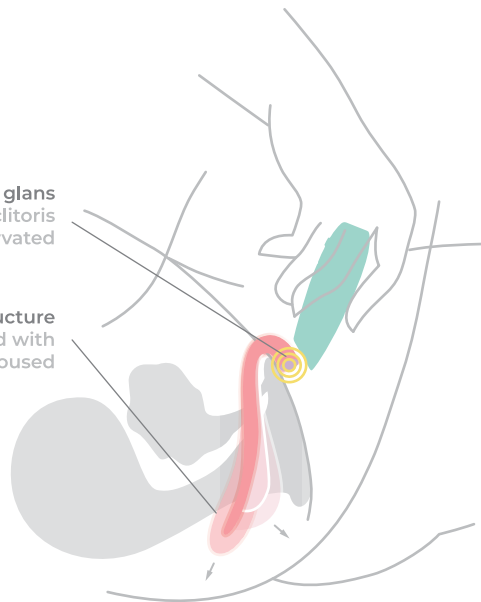

... it's worth getting to know each other first.

First Things First

Sweet Nothings

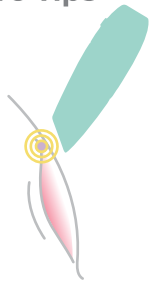

- Clitoral glans**
 - Visible part of the clitoris
 - Richly innervated
- Erectile clitoral structure**
 - Gets engorged with blood when aroused

DISCOVER YOURSELF

Remember that your vibrator is a device, but your body isn't! What brings pleasure varies between vulva owners, and from one day to the next. Keep on exploring yourself, be curious about your sensations and renew the experience every time. Just like you would for good partner sex!

Pleasure Tips

Apply the curved dip of The Whisperer's head on the clitoral glans to create a gentle embrace.

Find the right spot and angle for you. Pleasure is not symmetrical, and you might feel more sensations on the right upper side of the clitoris!

If direct contact is too intense, add a layer of fabric in between the clitoris and The Whisperer.

Introduce The Whisperer for partner sex to enhance intercourse and to expand outercourse.

Vibrator Hygiene

The Whisperer might speak in a low voice but is has high hygiene standards. To keep it clean and happy, wash it with water and soap, then pat it dry. We recommend doing this before and after use.
